NIDUS (Network for Investigation of Delirium across the U.S.) will be offering monetary, 1-year pilot awards for new research projects related to delirium. The purpose of these awards will be to support pilot studies to encourage innovative research targeting priority areas of delirium investigation. Two grants of \$50,000 each (total direct costs) will be awarded in 2018. Indirect costs are supported. Awardees will be notified by February 28, 2019. Two application tracks are available: junior investigator track and established investigator track.

Junior Investigator Track: The Junior Investigator Track is aimed for new investigators who plan to dedicate a significant portion of their professional effort on delirium. A Junior Investigator's application requires commitment of a mentor and a statement on career development plans. Eligibility criteria for Junior Investigator Track are:

- No more than 10 years from completion of final training degree (e.g. physician board certification, PhD, nursing degree, etc.)
- Not intended for investigators who have received significant extramural funding such as NIH R-awards, K23, K08, K12, KL2 or AHA Young Investigator Awards.
- An appropriately qualified mentor with a mentorship plan is required.
- Investigator should have at least 50% protected time to pursue research.

Experienced Investigator Track: The Experienced Investigator Track is aimed at established researchers who aim to use the pilot money to develop ongoing scientific investigations to further delirium research.

The selected **priority areas** for this year will include: (1) risk factors, prognosis, outcomes; (2) pathophysiology, mechanisms, biomarkers, genomics and other –'omics' approaches; (3) diagnostic tools and phenomenology; (4) clinical interventions for prevention and treatment. Pilot awards can support clinical, translational, or basic science proposals.

Note: Both US and International (non-US) investigators are eligible to apply.

Application criteria:

1. Proposal must be related to delirium research
2. Proposal must include the following sections:
 - a. Abstract (1/2 page max)
 - i. Study title
 - ii. Abstract
 - b. Science (3 pages max)
 - i. Specific aims/hypothesis
 - ii. Importance of project for the candidate's career development (Junior Track) and/or for the overall research goals (Established Track)
 - iii. Background and significance
 - iv. Research design and methods
 1. Study design
 2. Sample inclusion and exclusion criteria
 3. Statistical analyses
 - a. Sample size and power considerations
 - v. Study strengths and limitations
 - c. Statement on Career Development Plans (1 page max – For Junior Investigator Track Only)
 - d. Statement on how applicant will grow a research program focused on delirium (1/2 page)
 - i. How proposal will lead to future funding in delirium research
 - e. Appendices
 - i. Reference list
 - ii. Applicant's NIH Biosketch

- iii. *Junior Investigator Track Only*: Mentor statement (1 page max) and Mentor's NIH Biosketch
 - iv. Key research team members' NIH Biosketches
 - v. Resources and Environment (1pg)
 - vi. Budget for pilot (Up to \$50,000 USD Total Direct Costs)
 1. Indirect costs up to 63% (US institutions) or 8% (foreign institutions) are also supported.
 - vii. Budget justification (2 page max), including description and justification of research team
 - viii. Timeline for pilot with quarterly milestones (specific objectives to be achieved in each quarter).
3. *Resubmissions*: Proposals previously submitted for NIDUS Pilot Awards can be resubmitted. Resubmitted proposals should include an additional ½ page introduction indicating changes and improvements that have been made since the previous submission. If the previous submission received specific comments from reviewers, responses to reviewer comments should be fully addressed in the ½ page. This section should be included between the Abstract and Scientific Plan, and is not counted in the overall page limit.

Proposals will be evaluated based on:

1. Significance
2. Evidence of commitment to establishing/developing delirium research program
3. Investigator(s)
4. Innovation
5. Approach
6. Feasibility
7. Environment
8. Career Development (for Junior Investigator Track Only)

Formatting and Submission instructions:

Please submit your proposal in PDF format as a single document with all application elements and appendix included. Proposals should follow general NIH formatting guidelines (11 point Arial font, with 0.5 inch margins on all sides). Biosketches should follow the most current NIH guidelines, accessible at: <https://grants.nih.gov/grants/forms/biosketch.htm>.

Please include a cover sheet containing the following information:

1. Your name
2. Your institution/organization
3. Contact information (email address, phone number, mailing address)
4. Title of project
5. Submission for Junior or Experienced Investigator Track (indicate which category)
6. *Junior Investigator Track only*: Include mentor's name and institution
7. *Resubmissions only*: Please indicate if the proposal is a resubmission from the 2017 NIDUS Pilot Grant Cycle

Applications are due by **Wednesday November 7, 5:00pm EST**. *No late or incomplete applications will be accepted.*

- Email your application to the NIDUS Program Coordinator, Kristen Erickson, at nidus@hsl.harvard.edu
- Please use the subject line "2018 NIDUS Grant Award Application"

Expectations upon award

If awarded, achievement of study milestones will be tracked with a mid-point and final progress report, as well as semi-annual teleconferences between the PI and NIDUS Pilots Task Force leadership. Awardees will also be expected to present their findings at the American Delirium Society Annual meeting, and to report subsequent publications or funding that arises from the pilot grant to NIDUS. These expectations will be included in detail in the scope of work document upon award of the pilot and will be discussed with each award recipient at the start of the funding period.
