This NIDUS webinar outlines ways to support the recruitment, decision-making and inclusion of older people in research when delirium is present or likely. Presenters will outline relevant ethical and legal considerations, along with their recent research findings about older peoples’ perspectives on these matters and what approaches appear to support their inclusion in delirium and/ or dementia research. The presentation is relevant to researchers, clinicians, ethics committee/ IRB members, older people and their family members. This session’s Moderator/ Discussant will be Dr. John Devlin.

When: Monday, February 6, 2023, 4:00-5:00pm EST
