Paul B. Beeson Emerging Leaders Career Development Award in Aging (K76)

Funding opportunity from the National Institute on Aging: early-stage physicians and other health professional investigators with a commitment to aging and/or aging-related diseases can apply for this award to advance their research and leadership skills in their speciality and in the broader field of aging and geriatrics research!

Deadline for application is October 22, 2019. [CLICK HERE](#) to learn more about the award with clinical trial required, and [HERE](#) for clinical trial not allowed.

NIA is pursuing this initiative to recruit early-stage investigators who have begun to establish research programs and who, through this award, will be ready to assume leadership roles in their field of expertise and be poised to change theory, practice, and health outcomes related to the health of older individuals. Unlike other mentored K awards, candidates for this award must have received competitively awarded research support as a Program Director/Primary Investigator (PD/PI) at the faculty level or have otherwise leveraged faculty-level research support to develop an independent line of research. They must show evidence of leadership in the clinical or research domain.
