NIDUS Delirium Boot Camp 2022 **“Building Blocks to Clinical Trials”**

Network for Investigation of Delirium: Unifying Scientists

Calling all junior investigators interested in delirium research!

Applications for the 10th Annual NIDUS II Delirium Bootcamp are now open and will be accepted until **Friday, July 22, 2022, 5pm EST**.

Funded by the National Institute of Aging R13185760, the 2022 Boot Camp will be held **live, onsite** at the University of North Carolina in Chapel Hill, NC from Sunday, November 13 to Tuesday, November 15.

Please visit [the NIDUS Career Development page](#) for application instructions, the application form, and more detailed information about the 2022 Boot Camp program, including an interview with a prior Boot Camp attendee.

Goal of the Boot Camp

To develop a multidisciplinary pipeline of well-trained translational, epidemiologic, and clinical delirium researchers.

Held **live** over an intensive 2.5 days, the 2022 Boot Camp will provide:

- NIH-style mock grant reviews of all submitted mentee proposals
- multiple interactive didactic sessions (covering a wide range of topics relevant delirium research)
- in-depth training on the CAM (and its related short-forms tools)
- networking sessions on multiple career-development topics
- a number of breakout sessions

While the theme for the 2022 Boot Camp is “**Building Blocks to Clinical Trials**,” the 2022 Boot Camp is highly relevant to junior investigators conducting any type of translational or clinical delirium research (and not just clinical trials).

Note: The 2022 Boot Camp Program is currently being finalized and will posted in March 2022.

Thank you for spreading word about the 2022 Bootcamp to your colleagues and trainees.

Jan Busby-Whitehead, MD

John W. Devlin, PharmD
