

The 2023 Boot Camp Application is Now Live

Dear Colleagues,

Applications for the 2023 NIDUS Delirium Boot Camp are now open! This NIA-funded research training opportunity (R13185760) will be held Sunday, October 29 to Tuesday, October 31, 2023 on the beautiful campus of UNC-Chapel Hill, NC. **Learn more and apply for the 11th Annual NIDUS Delirium Boot Camp:**

- [Read an overview of the NIDUS Boot Camp training program](#)

The Boot Camp centers around junior researcher mentorship and engagement. This year's theme is ***Advancing Translational and Implementation Research in Delirium***. Program highlights include interactive didactic sessions on a broad range of topics, mock-NIH study sections, formal (and informal) networking and mentorship sessions. And some great Southern food!

Important Things to Note

- International applications are encouraged.
- The program covers all mentee travel and hotel costs.
- While mentee research proposals must evaluate delirium as an outcome, this can be a secondary outcome. Having delirium as the sole focus of the project is not a necessity.

Please share this information with trainees, colleagues, and junior faculty who you think might be interested in applying to our well-established delirium research training program.

Boot Camp. Collectively, these individuals have expertise in fields like animal models, biomarkers, epidemiology, clinical trials, implementation science, delirium assessment, and statistical methods (and their application in the clinical settings where delirium is most frequently encountered).

Boot Camp Alumni

A motivated group of **more than 100 junior delirium researchers** have graduated from the NIDUS Boot Camp. Many of these Boot Camp alumni now have significant research funding and are leaders in their respective fields.

Questions?
