Highlights from the 2023 American Delirium Society (ADS) Annual Meeting

Last month members of the NIDUS II team gathered in Providence, RI from June 11 to June 13 for the American Delirium Society’s Annual Meeting. Those in attendance included:

- Dr. Sharon K. Inouye, MD, MPH, Harvard Medical School (NIDUS II Multi-Principal Investigator)
- Dr. Richard N. Jones, ScD, Brown University (NIDUS II Multi-Principal Investigator)
- Dr. Jan Busby-Whitehead, MD, UNC School of Medicine
- Dr. John Devlin, PharmD, Northeastern University
- Dr. Edward Marcantonio, MD, SM, Harvard Medical School
- Dr. Eva Schmitt, PhD, Harvard Medical School
- Dr. Fritz Sieber, MD, Johns Hopkins School of Medicine
Below are a few highlights from this year’s ADS meeting.

**NIDUS Symposium: Harmonizing Measures to Advance Delirium Research**

On Day 1, Dr. Rich Jones moderated a NIDUS symposium on [measurement harmonization](#). Joining him in this discussion were Ben Helfand, MD, PhD, Fah Vasunilashorn, PhD, and Miles Berger, MD, PhD.

The presenters discussed the value of harmonizing data across multiple delirium studies. They also reviewed how Item Responsive Theory can help harmonize results across multiple studies. And they explained the use of General Cognitive Performance Composite for harmonizing cognitive outcome data from multiple postoperative studies.
Dr. Rich Jones presenting in the NIDUS Harmonization session.

---

**NIDUS Oral Abstract Presentations**

During the conference, several investigators presented oral abstracts on their research in two separate NIDUS sessions. Each of these presenters is either a NIDUS Boot Camp graduate or has received NIDUS PILOT funding.

Karla Krewulak, PhD, presenting her oral abstract.

---
Oral Abstracts: Round 1

Drs. Jan Busby-Whitehead and John Devlin moderated the first round of presentations. The following delirium investigators presented their research:

- **Karla Krewulak, PhD** - University of Calgary, Department of Critical Care Medicine; *Validation of Group-Based Trajectories of Delirium Severity and Evaluation of Outcomes in Critically Ill Adults: A Population-based Cohort Study*

- **Sangil Lee MD** - University of Iowa, Department of Emergency Medicine; *EMR Delirium Risk Estimator for ED Patients*

- **Leah Acker, MD, PhD** - Duke University, Neuroanesthesiology, Otolaryngology and Offsite Anesthesiology Division; *Preoperative electroencephalography (EEG) alpha power changes during simple eyes-closed/eyes-open tasks are associated with postoperative inattention and delirium severity*

- **Eleonora Rollo, MD** - Università Cattolica del Sacro Cuore, Department of Neurosciences; *Focal Slowing of Resting State EEG Predicts Delirium Occurrence in Acute Stroke: A Prospective, Observational, Cohort Study*

---

Ting Ting Wu, PharmD, BCPS, presenting her oral abstract.

**Oral Abstracts: Round 2**

Drs. Rich Jones and Tom Travison moderated the second NIDUS oral abstract session featuring the following investigators:
older adults with preexisting cognitive impairment

- Ting Ting Wu, PharmD, BCPS - UCLA, Associate Professor, Department of Molecular and Medical Pharmacology; Impact of Addressing Pain Missingness on the Relationship Between Pain and Delirium in Critically Ill Patients

- Tanya Mailhot, PhD, RN - Université de Montréal, Sciences Infirmières: Barriers and Facilitators to Unlicensed Assistive Personnel’s Involvement in Delirium Care on Acute Care Units: A Multi-Method and Multi-Site Study

NIDUS Pilot & Collaborative Working Group Presentations

Drs. Fritz Sieber and John Devlin moderated a session on NIDUS Pilot Award collaborations. The following researchers gave presentations about their collaborative projects.

- Moushin Shafi, MD, PhD - Harvard University, Department of Neurology; Preoperative EEG features are associated with postoperative delirium severity

- Robert Stevens, MD - Johns Hopkins University School of Medicine; Modeling delirium risk: Decoding electronic health data with artificial intelligence

- Ben Palanca, MD, PhD, MSc - Washington University School of Medicine, Department of Anesthesiology; Efforts of Harmonizing electroencephalographic recordings for delirium multisite clinical trials

- Flavia Garcez, MD - Universidade de Sao Paulo, Brazil, Faculdade de Medicina; Gut Microbiota and Delirium Occurrence: Insights from a cohort of Acutely Ill Older Adults

2023 NIDUS Delirium Boot Camp Applications

Boot Camp applications are due Monday, July 10, 2023 at 5pm EDT. This year’s theme is "Advancing Translational and Implementation Research in Delirium." Visit the 2023 NIDUS Delirium Boot Camp page to download and
Apply for the 2023 NIDUS Boot Camp

October 29-31, 2023
The University of North Carolina at Chapel Hill

Application deadline:
July 10, 2023 at 5pm EST.

Johns Hopkins ICU Rehab VIRTUAL Conference

Registration is now open for the 12th Hopkins ICU Rehab VIRTUAL Conference. Learn more about the event and register here.

12TH ANNUAL JOHNS HOPKINS CRITICAL CARE REHABILITATION CONFERENCE

VIRTUAL EVENT

Live November 8-11, 2023
On-Demand October 19, 2023 until December 18, 2023

About NIDUS

NIDUS is a collaborative research network dedicated to spurring innovation and new advances in delirium research through development of new research and measurement resources, training opportunities, pilot funding and dissemination of information. It is funded through an award from the National Institutes of Health/National Institute on Aging (grant no. R33AG071744).
