

NIDUS Delirium Boot Camp 2022

Network for Investigation of Delirium: Unifying Scientists

Calling all junior investigators interested in delirium research!

Applications for the 10th Annual NIDUS Delirium Boot Camp are now open and will be accepted until **Friday, July 22, 2022 at 5pm EST**.

Funded by the National Institute on Aging, [the 2022 Boot Camp](#) will be held live from Sunday, November 13 to Tuesday, November 15 at the University of North Carolina in Chapel Hill, NC.

Please visit the [Career Development page](#) for application instructions, the application form, and detailed information about the 2022 Boot Camp program.

The over-arching goal of the Boot Camp is to develop a multidisciplinary pipeline of well-trained translational, epidemiologic, and clinical delirium researchers through:

- an intensive two and a half days of mock grant reviews
- multiple interactive didactic sessions covering a wide range of topics relevant to all areas of delirium research
- in-depth training on the CAM and its related short-forms tools
- networking sessions on multiple career-development topics.

While **Building Blocks to Clinical Trials** is the theme for the 2022 Boot Camp, the interdisciplinary programming is wide-ranging. Investigators, regardless of their research type (e.g., translational, epidemiologic, or clinical) or clinical setting, are encouraged to apply.

Please spread the word to your colleagues and trainees.

Thank you,

Jan Busby-Whitehead, MD
John W. Devlin, PharmD
