

NIDUS Career Development Award Research Mentoring Session

Presenters: Tom Gill, MD

Nicholas Reed, AuD

Time	Section
02:29	<p><u>Key Components</u></p> <ul style="list-style-type: none"> • Candidate • Career development plan • Research plan • Mentor’s statement • Environment and institutional commitment
02:59	<p><u>Identifying a Mentor</u></p> <ul style="list-style-type: none"> • Has achieved national recognition for his/her research • Track record of mentoring other successful early-stage investigators • Provides timely feedback on manuscripts and grants • Promotes trainee’s national reputation • Allows trainee to take credit for his/her successes
04:16	<p><u>Candidate</u></p> <ul style="list-style-type: none"> • Demonstrate your commitment to a research career (discuss your career goals) • Provide evidence of your potential to develop into independent investigator (highlight your accomplishments) • Usually must commit at least 50%-80% effort to research program and training • Often includes letters of recommendation addressing your potential for a research career
05:50	<p><u>Example of Career Goals</u></p> <ul style="list-style-type: none"> • The applicant’s long-term goal is to develop a career as an independent investigator in aging research with a primary focus on...(fill in the blank) • Immediate goals are: <ul style="list-style-type: none"> ○ To study care fragmentation in older patients who receive care in multiple settings ○ To obtains additional methodologic expertise with formal coursework ○ To participate in a team research environment, learning all aspects of health services research in aging
06:56	<p><u>Career Development Plan</u></p> <ul style="list-style-type: none"> • Didactic training (typically decreases over time) • Supervised research experience (typically increases over time with transition to independence) • Tailored to needs of individual candidates and concordant with career goals and prior experience • Advanced degree is a means to an end • Describe “x”-year training program (be specific, plan to acquire new skills/techniques) • Outline a plan in which you assume increasing independence (publications and future grant submissions) • Provide time-line and break-down of effort (be ambitious, but realistic)
09:41	<p><u>Research Plan</u></p> <ul style="list-style-type: none"> • Specific aims <ul style="list-style-type: none"> ○ Should clearly articulate what you are trying to accomplish and why ○ Subsequent sections must flow logically ○ Highlight gap in knowledge ○ Provide overall objective, followed by more narrowly focused primary and secondary aims ○ Include at least one testable hypothesis ○ Define critical terms • Research strategy <ul style="list-style-type: none"> ○ Significance

	<ul style="list-style-type: none"> ▪ Describe scope and significance of study problem ▪ Review relevant literature, highlighting potential gaps and limitations of prior research ▪ Link each subsection to the proposed research ▪ When applicable, include published reports of potential reviewers ▪ Present conceptual model (example infographic) ○ Innovation <ul style="list-style-type: none"> ▪ Does application challenge or seek to shift current research or clinical practice paradigms? ▪ Are novel concepts/approaches/methods/instrumentation/interventions employed? ▪ Do not simply reiterate the significance ○ Approach, including preliminary results <ul style="list-style-type: none"> ▪ Describes plan to accomplish the specific aims to proposed research ▪ Provide information: research design, study population, data collection procedures and instruments, key variables, analytic plan (including sample size and power calculations) ▪ Justify all important decisions ▪ Consult biostatistician for complicated analyses ▪ Highlight specific rigor (quality of data, including reliability and validity) and generalizability of anticipated findings ▪ Include detailed timeline, denoting projected start and completion of important study tasks (should not be unrealistic or overly ambitious)
16:31	<p><u>Preliminary Results</u></p> <ul style="list-style-type: none"> • Describe published and unpublished studies <ul style="list-style-type: none"> ○ Establishes competence and experience in relevant content area ○ Demonstrates capacity to successfully complete research project and present results in clear and thoughtful manner • May describe relevant work completed by mentor or important collaborator • Indicate relevance to proposed research
17:35	<p><u>Mentor’s Statement</u></p> <ul style="list-style-type: none"> • Mentor’s qualifications and areas of expertise • Nature and extent of planned supervision/mentoring • Primary mentor (captain of the ship) • Other mentors (content, methods, career development)
18:27	<p><u>Environment and Institutional Commitment</u></p> <ul style="list-style-type: none"> • Document strong, well-established research and training program • Letter from department chair or equivalent <ul style="list-style-type: none"> ○ Commitment to candidate’s development into independent investigator ○ Assurance that candidate will have sufficient protected time for training and research ○ Faculty appointed is not contingent on receipt of award ○ Availability of adequate resources, e.g. office, lab, administrative support, etc.
19:46	<p><u>Optimizing Success (ABCD’s)</u></p> <ul style="list-style-type: none"> • Allow sufficient time, e.g. 6 months <ul style="list-style-type: none"> ○ Revise, revise, revise ○ Get feedback from colleagues, mentor ○ Do not submit prematurely ○ Allow time for Grants and Contracts • Be hypothesis-drive • Clearly state what impact your work will have on a field • Don’t be overly ambitious

	<ul style="list-style-type: none"> • Always include preliminary data • Be considerate of reviewers <ul style="list-style-type: none"> ○ Use readable fonts and leave some white space ○ Minimize abbreviations • Convey your excitement and enthusiasm • Discuss data interpretation and alternative hypotheses • Ask a successfully funded researcher to critique your grant proposal before you submit it • Be organized <ul style="list-style-type: none"> ○ Use headings and diagrams to help reviewers get oriented • Call program officer (NIH) • Don't be discouraged by rejection • Proposal should be easy to read and understand <ul style="list-style-type: none"> ○ Logical, clear, internally consistent ○ Cross-reference • Repeat same information, ideas, or themes in consistent way throughout proposal <ul style="list-style-type: none"> ○ Have section in methods for each specific aim ○ Repeat the aim verbatim at beginning of that section • Neatness counts <ul style="list-style-type: none"> ○ Avoid misspellings, grammar errors, and mistakes in references • Obtain copies of successful grants • Read instructions carefully
23:11	<p><u>Useful Resource</u></p> <ul style="list-style-type: none"> • Gill TM, McDermott MM, Ibrahim SA, Petersen LA, Doebbeling BN. Getting funded. Career development awards for aspiring clinical investigators. J Gen Intern Med 2004; 19:472-478.
25:38	<p><u>“Hearing Loss and the Healthcare System”: A K23 Story”</u></p>
25:54	<p><u>Mentee: Nick Reed</u></p> <ul style="list-style-type: none"> • His background
28:05	<p><u>What changed?</u></p> <ul style="list-style-type: none"> • Sensory loss has been associated with delirium • Focusing in on hearing loss... <ul style="list-style-type: none"> ○ Case of delirium: 35-year-old, male, Von Hippel-Lindau (Tumors on spine, brain, lungs), recent MI, Neurologically normal
30:18	<p><u>Enter Mentor Esther Oh</u></p> <ul style="list-style-type: none"> • Expert in delirium and dementia • Decided to do something on hearing and healthcare
30:59	<p><u>Preparing the Grant</u></p> <ul style="list-style-type: none"> • Grant writing training <ul style="list-style-type: none"> ○ Graduate training in clinical investigation (PhD program) ○ Two grant writing courses (quarter 2 and quarter 4) separated by intense methodology courses <ul style="list-style-type: none"> ▪ Conceptually: writing the framework and then filling in the approach with the appropriate course sequence ○ Lots of feedback from peers without any experience in your field • First draft completed after course • Key moment here was <u>“slowing down!”</u> <ul style="list-style-type: none"> ○ we didn't have the preliminary data or strong outcomes identified (infographics for hearing loss and health care expenditures and utilization) → came back to this data for the grant ○ the mentorship team was not thoughtfully put together ○ Dr. Oh “Submit this as if it's going to be funded on the first try” • Planning a patient-provider communication QI (figures from grants shown)

	<ul style="list-style-type: none"> • IOM 2001: patient-provider communication is a cornerstone of patient-centered care <ul style="list-style-type: none"> ○ "...care that is respectful of and responsive to individual patient preferences, needs, and value..."
38:49	<p><u>Conceptual Framework</u></p> <ul style="list-style-type: none"> • Showed flowchart/infographic (exposure, mediators, immediate outcomes, long-term outcomes)
39:42	<p><u>K23 Aims</u></p> <ul style="list-style-type: none"> • Aim 1: to investigate the association between hearing loss, communication impairment, and hearing aid use with health care outcomes in older adults in epidemiologic cohorts • Aim 2: to characterize incidence of delirium among hospitalized older adults with and without hearing loss • Aim 3: to refine and assess the feasibility and acceptability of implementing a comprehensive hearing loss screening and intervention program to improve care outcomes in the inpatient setting • K23 is more than science...
41:14	<p><u>Story Telling</u></p> <ul style="list-style-type: none"> • A key aspect of writing the candidate background was telling a linear story that showed there was scientific competence and personal drive to move into this area of work <ul style="list-style-type: none"> ○ The preliminary studies were a key component of this
41:40	<p><u>Goal Setting</u></p> <ul style="list-style-type: none"> • Break into short term (1-5 year) and long term (6-10 year) <ul style="list-style-type: none"> ○ Short term: what will this grant provide me with (training oriented) ○ Long term: where can I go with the foundation from this grant (science oriented) • Use SMART goal techniques (achievable, action-verbs) • Parallel structure to didactic component of the grant
43:32	<p><u>Networking</u></p> <ul style="list-style-type: none"> • Primary mentors (2) and co-mentors (4)
46:08	<p><u>Mentor Team</u></p> <ul style="list-style-type: none"> • Spelling out exact responsibilities and how they relate to the grant was important • Share the load across mentors! • Shows an example • Included roles in the training plan
46:39	<p><u>Aim 1</u></p> <ul style="list-style-type: none"> • Successfully added hearing measures to ARIC and NHATS studies • Literature published suggesting hearing loss associated with reduced health literacy, reduced satisfaction with healthcare, changes in help-seeking behaviors, and unmet health needs • Shows tables infographics from papers (in relation to all aims)
47:01	<p><u>COVID Impact</u></p>
47:22	<p><u>Successful Relationship</u></p> <ul style="list-style-type: none"> • Different perspectives from different backgrounds • Regular communication • Introduction to network • Dr. Oh has a knack for knowing when to push and giving space
48:08	<p><u>Questions and Answers</u></p>
